

Refer a business to Veeqo

and we'll give you a free Amazon Echo Show

If you currently use Veeqo to power your retail company, recommend us to another business like yours and we'll reward you with an Amazon Echo Show once they sign up.

Our story

Veeqo started out when retailer Matt Warren wanted to grow his ecommerce business. Matt was running a multi-million pound retail business, but found it almost impossible to manage multiple orders from multiple marketplaces. He thought there had to be a better way to run a successful ecommerce business.

That's why he created Veeqo.

February 2013

Retailer Matt Warren starts building Veeqo from his home in Swansea, South Wales.

September 2014

Veeqo is released to a small handful of customers in beta mode.

February 2016

Veeqo is launched to the world, and officially out of beta – complete with a new eBay integration.

May 2015

Veeqo raises \$1m of seed funding from retail magnate and founder of UK retail chain New Look, Tom Singh.

January 2016

Veeqo gets its next major update – a brand new listing tool, allowing retailers to easily sell multichannel. Also released is an iPhone app.

March 2016

Veeqo acquires London-based shipping startup ParcelBright.

December 2016

Veeqo raises £1.2m on the crowdfunding platform Seedrs, at a company valuation of £8m.

July 2017

Veeqo is granted an investment of £500k by the Welsh Government, with a commitment to create another 170 jobs in the business over the next three years.

August 2017

Our brand new app store, the Veeqo Marketplace, is launched.

October 2017

Our first ever hardware device, the Veeqo Scanner, launches

View multichannel orders in a single platform, keep inventory levels 100% accurate, ship orders in bulk and view sophisticated sales reports.

Win back flexibility with Veeqo. Create, edit and manage orders from the palm of your hand.

Stock Location
Stay on top of your inventory across all your warehouses. Update the location of any of your SKUs using only your phone.

Veeqo integrates seamlessly with the world's biggest ecommerce platforms, marketplaces, shipping couriers and accounting platforms.

Developer API

Everything you need to build the world's most powerful tools for ecommerce

Integrate any external application or service with a retailer's Veeqo account.

This allows you to do just about anything you can do in the Veeqo app using the programming language of your choice

Building integrations with external software can be a headache - we've been there and done that - so our approach is different. With an open API and expert support at hand, we make integrating with Veeqo not only as easy but also as rewarding as possible.

We've grown a developer ecosystem that allows developers to find the resources and support they need with ease and its continually evolving and getting better.

```
// perform a series of experiments on files. Determine average time to
// count words in files of various sizes
private static void performExp() {
    String[] smallerWorks = {"smallWords.txt", "ZBR02B.txt", "Alice.txt", "SherlockHolmes.txt"};
    String[] bigFile = {"ciaFactBook2008.txt"};
    timingExpWithArrayList(smallerWorks, 50);
    timingExpWithArrayList(bigFile, 3);
    timingExpWithMap(smallerWorks, 50);
    timingExpWithMap(bigFile, 3);
}

// pre: titles != null, elements of titles refer to files in the
// same path as this program, numExp >= 0
// read words from files and print average time to count words.
private static void timingExpWithMap(String[] titles, int numExp) {
    try {
        double[] times = new double[titles.length];
        final int NUM_EXP = 50;
        for(int i = 0; i < NUM_EXP; i++) {
            for(int j = 0; j < titles.length; j++) {
                Scanner fileScanner = new Scanner(new File(titles[j]));
                Stopwatch st = new Stopwatch();
                st.start();
                Map<String, Integer> words = countWordsWithMap(fileScanner);
                st.stop();
                System.out.println(words.size());
            }
        }
    }
}
```
